ABOUT ME

I'm Tomás Guerineau, an accomplished Full Stack Developer with several years of experience across diverse projects. Currently, I'm working at Teach Away, implementing TypeScript, JavaScript, AWS, Next.js, React.js, Sass and sometimes Vue.js, GraphQL, among others. My technical expertise spans from developing corporate websites, mobile applications, web platforms to freelance web development for startups. Dedicated to continual learning, I readily embrace new technologies and pursue professional growth relentlessly.

WORK EXPERIENCE

● **Full Stack Web Developer -** Weknow Inc. - August 2021 - January 2024

I worked as a Full Stack developer in international teams for a client and also in an internal platform and the Company's own sites.

- The company's website, built (in 2023) with state-of-the-art technologies like TypeScript, Next.js, Tailwind, Styled Components, and incorporating Atomic Design principles.
- The company's platform provides tools for different areas of the company (Recruitment, HR, Management, Clients/projects, employees, etc), and I take care of maintaining it, creating new features and solving possible bugs. For it I use React.js, Node.js, Meteor.js, MongoDB and Sass.

For the **Phase2** client I worked as Full Stack in different projects with international teams, in them I used Drupal, PHP, SQL, Twig and Sass. The projects are:

- Multiple E-commerce site (multiple clients and translated into all languages), I worked on maintaining the site for 3 months, making changes requested by clients and solving bugs that the site had.
- We created in +2 months a new site for a company that needed to train its employees, on the site you can see courses and documentation. On this site I was able to create a custom module and use multiple services.
- We created a new site for a museum in 2 months, where you can see their works and also view/register for their events.

● **Semi Senior Frontend Developer at Pluribus -** TeachAway/Skooli Online Tutoring - January 2024 - July 2024

In this role as Semi-senior frontend developer, I contributed to the development of an advanced meeting platform designed to facilitate seamless interactions between students and tutors. My responsibilities included:

- Developing and maintaining features using React, TypeScript, and JavaScript, occasionally using Vue.js, GraphQL, among others, ensuring a responsive and user-friendly interface.
- Integrating AWS Chime SDK to enable high-quality video conferencing, audio controls, and meeting functionalities.
- Building reusable and efficient components.
- Collaborating with cross-functional teams to implement new features and optimize existing ones for performance and scalability.
- Debugging and resolving technical challenges to maintain a high standard of functionality and reliability.
- Working with backend developers to ensure seamless integration with server-side logic.

● **Semi Senior Full Stack Web Developer at Pluribus -** The Learning Network - July 2024 - Currently working

As a full stack web developer, I specialize in building and maintaining dynamic, user-friendly web applications with a strong emphasis on frontend development. My current responsibilities include:

- Developing and optimizing web solutions using PHP, SQL, AWS and Docker.
- Creating intuitive, responsive, and scalable user interfaces tailored to meet client needs using React.js, Next.js, JavaScript, TypeScript, etc.
- Collaborating with cross-functional teams to integrate frontend and backend components seamlessly.
- Implementing performance optimizations and ensuring high-quality code through testing and debugging.

SKILLS

- React.js - Node.js - Next.js - Meteor.js - Express.js - AWS - Redux - Drupal - Vue.js
- **Tests:** Jest, React Testing Library and PHPUnit.
- Mongodb - MySQL - PostgreSQL - GraphQL
- TypeScript - JavaScript - PHP - SASS - HTML - CSS - Twig.
- Storybook - Styled component - Atomic Design.Mongodb - Tailwind - Bootstrap - Material UI - Ant Design - Among others.
- jQuery - Docker - Linux.

LANGUAGES

- Inglés (B2+)
- Español (Nativo)

EDUCATION

- **Full Stack Course - Rolling Code**
Complete - 2020 - 2021

Final project: 100% dynamic e-commerce, built with React, Node.js (Express.js) and MongoDB.

- **Higher Technique in Programming - UTN (The National Technological University)**
Complete - 2020 - 2021

40% of the university degree completed. 2018 - 2019

- **Architect - FAU of the UNT (The National University of Tucumán)**

Carried out up to 4rd year - 2013 - 2017
